Discworld Figurines: When Clarecraft announced they were closing down their business, we placed a flurry of orders with them to stock up before it was too late. It seems Clarecraft underestimated demand amongst Discworld fans as they have been inundated with orders. Clarecraft have let us know they will not be fulfilling all orders. We begged but have been told only some of ours will be sent. Most of the stock we ordered was to satisfy specific customer orders. However, we are still hoping to receive at least one more batch of stock, though probably not for another month or more. On a brighter note, we currently have *Thud!* and *Where's My Cow?* in hardcover, *Going Postal* in paperback and also *Thud* the boardgame.

Book Reviews

Cart and Cwiddler by Diana Wynne Jones

This is the story of a boy and his family who travel from village to village in a horse drawn cart singing songs and playing a cwiddler – a magical instrument.

It is a gentle read and a great introduction to reading fantasy. Very suitable for the young reader.

Drowned Ammet by Diana Wynne Jones

Full of adventure, fantasy and a little mystery, this is a thoroughly enjoyable read. The story is of a boy, a village and the people he meets. Quite fast paced at times and one wants to keep reading.

If you love the sea and sailing you will find this book enthralling. Young readers should enjoy this book.

Breathe by Penni Russon

Breathe is a wonderful coming of age story, set in Hobart and surrounds. Undine and Trevor (better known as Trout) are coming to terms with the events of the previous summer, in which they discovered that Undine is magic. Her mother kept this secret from her, knowing the truth, and that she would discover it for herself one day. Undine has promised not to use the magic during her final year at school, but it seems that life has other plans. Trout has been researching the magic, and finds himself in over his head with people who want to use the magic for themselves.

Breathe is a story of discovery of self for Undine and Trout, as well as learning to cope with the concealed motives of others. This is a well written book that will ring true to teenagers with the difficulties of coping with the changes that are taking place in their lives.

The full sweep of the rich history of Avalon – from the fall of Atlantis to the founding of a new temple on the mist-shrouded isle of Britain – is revealed in this magnificent tale. Although the priests and priestesses of Atlantis have known for years that the Sea Kingdoms were doomed, the arrival of the final destruction finds them ill-prepared for what lies ahead. On the last island to fall, Micail and Tiriki – prince and princess as well as priest and priestess – are separated during the escape. Micail and his cousin, Prince Tjalan, arrive at their planned destination, a trading post in the Hesperides (the British Isles), where Tjalan loses no time in taking charge. He dreams of founding a glorious new empire in the traditions of Atlantis – whether the local tribes like it or not. To fulfil an ancient prophesy that they will build a great temple in this new land, Micail and the other priests set about finding a way to shift the huge blocks of granite that will become Stonehenge. Blown off-course by a storm, the ship carrying Micail's beloved wife Tiriki lands on the wrong shore of the Hesperides. She and the elderly priest Chedan lead their small group in forming a new community in harmony with the local population at the sacred Tor (Glastonbury). Once the two groups become aware of each other, conflict will become inevitable. Hal Duncan*Vellum*

A magnificent, fantastical literary epic of Heaven and Hell in direct conflict, with sleeper agents who will murder, rape and torture at their master's command, and where the heroes will be lucky to save their own skins.

It's 2017 and the End Days are coming, beings that were once human gathering to fight in one last great war for control of the Vellum - the vast realm of eternity on which our world is just a scratch. But to a draft-dodging Irish angel and a trailer-trash tomboy called Phreedom, it's about to become brutally clear that there's no great divine or diabolic plan at play here, just a vicious battle between the hawks of Heaven and Hell, with humanity stuck in the middle, and where the easy rhetoric of Good and Evil, Order versus Chaos just doesn't apply. Here there are no heroes, no darlings of destiny struggling to save the day, and there are no villains, no dark lords of evil out to destroy the world. Or at least if there are, it's not quite clear which is which.

Here, the most ancient gods and the most modern humans are equally fate's fools, victims of their own hubris, struggling to save their own skins, their own souls, but sometimes... just sometimes... sacrificing everything in the name of humanity. **TP \$32.95**

Kate Elliott*In the Ruins (Crown of Stars 06)*

The world of Liath and Alain is breaking apart as King Henry's kingdom is savaged by earthly and supernatural forces, which they alone have the power to understand.

The Eika warriors thirst for the King's land and power, their enmity sealed by generations of blood. Bitter in-fighting within King Henry's court and the ceaseless attrition of raiders also weaken his reign.

Those who remain true must stay strong as the shadow of the Cursed Ones falls, and the spell holding the exiled from the planet fails. Liath must force her wild sorcery to maturity and Sanglant, her husband and King Henry's heir, must struggle to hold the realm together.

The twin destinies of Liath and Alain may yet avert the destruction written in the stars. **HC \$49.95 TP \$32.95**

More is at stake than he realised, and Kaspar is but a single player in a far broader game than he imagined, for pitted against the Conclave of Shadows are the agents of the Dark Empire, a looming menace that threatens not only Kaspar's homeland, but the entire world of Midkemia. **PB \$19.95**

Flight of the Nighthawks Darkwar 01

Magnus, go-between for the Conclave and the Great Ones on the world of Kelewan, realises that the Talnoy is acting as a rift 'magnet' – attracting the same dangers as on Midkemia. In Novindus, while studying the host of Talnoy secreted in the cave, Nakor is ambushed by a small group of bandits. Fortunately, Tomas – accompanying the small Islani – defeats the outlaws with ease. But one of their number fights with such ferocity that Tomas suspects him to be more than human. After several near-disastrous conflicts, Kaspar, Talwin and Amafi uncover the new nest of Nighthawks plotting against the royal house of Kesh. But when they attempt to warn the Emperor, it becomes clear that many of the truebloods – nobles related by birth to the Emperor – are already Varen's slaves, both willing and unwitting. **HC \$45.00**

A Breath of Snow and Ashes

Their love has survived time, but can they survive fate? 1772 - the eve of the American revolution. In Boston, men lie dead in the street and in the backwoods of America, isolated cabins burn in the darkness of the forest. The Colony is in ferment. Jamie Fraser, a passionate leader of men, receives an envoy from the Governor Josiah Martin, asking for help. The Governor needs someone to unite the backcountry, pacify the seething resentments of the settlers, and keep the mountains safe for King and Crown. Jamie Fraser, everyone agrees, is the man for the job. But Jamie knows what is to come. His wife, Claire, has travelled back in time from the twentieth century, and she knows that it's only a matter of a few years before the start of the War of Independence, ending with the exile or death of the men loyal to the King of England. Neither prospect appeals to Jamie. Beyond everything else, though, looms the threat of a tiny clipping from The Wilmington Gazette, dated 1776, which reports the destruction of the house on Fraser's Ridge, and the death by fire of James Fraser and all his family. Jamie hopes Claire is wrong, for once, about the future - but only time will tell. **TP \$35.00**

He would have no idea that he has a brother called Spider, who is also a god. And there would be no chance that said brother would be trying to take over his life, flat and fiancée, or, to make matters worse, be doing a much better job of it than him. Desperate to reclaim his life, Charlie enlists the help of four more-than-slightly eccentric old ladies and their unique brand of voodoo - and between them they unleash a bitter and twisted force to get rid of Spider. Gary Gibson*Angel Stations*

An intriguing, far-ranging space opera by a new British talent, tracing the interlocking stories of several characters - human, metahuman and alien - as the galaxy faces crisis. Aeons ago, a super-scientific culture known as "Angels" had left incomprehensible relics all over the galaxy. Among these phenomena were the Stations, whereby human spacecraft could jump instantly from one part of the galaxy to another. From them the brilliant Angel technology could be explored and exploited. One of these stations orbits the planet Kaspar, where the only other known sentient species outside Earth has been meticulously allowed to continue evolving in its own world of primitive ignorance. But suddenly Kaspar's mysterious "Citadel" has become the vital key to repelling the fast-approaching threat. At what cost, though, to its native inhabitants... and to the human residents of the orbiting Angel station? **PB \$19.95**

Karen Armstrong

A History of Myth

The series begins with Karen Armstrong's compelling investigation into myth; what it is, how it has evolved, and why we still so desperately need it. She takes us from the Palaeolithic period and the myths of the hunters right through to the Great Western Transformation of the last 500 years and the discrediting of myth by science. The history of myth is the history of humanity; our stories and beliefs, our curiosity and attempts to understand the world, link us to our ancestors and each other. Myths help us make sense of the universe; if we ignore them, we do so at our peril. Characteristically insightful and eloquent, Armstrong's book is a brilliantly thought-provoking introduction to myth in the broadest sense. **PB \$22.00**

The Space Race

From the author of *Seven Wonders of the Industrial World*, another highly anticipated TV tie-in charting the shocking but true story behind the space race - and the ruthless, brilliant scientists who fuelled it. This riveting account stretches from World War II through to the moon landings. With the two superpowers pitched against one another during the Cold War, this race to create the most powerful rocket and dominate the world culminates in 1969's 'giant leap for mankind'. Involving the most pioneering and high-risk experiments ever undertaken, the space race cost untold millions - and hundreds of lives, as mistakes were made, some too horrific to be made public at the time. Set against a backdrop of communism and espionage, it is a tale full of heroes and villains, individuals whose passion it is to be the winner of this dream at any cost. With ex-Nazi Wernher von Braun on the American side pitted against the enigmatic Sergei Korolev on the Soviet side, this revealing new history shows the extent to which politics and personal ambition combined to create an explosive race of epic proportions. **TP \$32.95**

Roy Harris

Rethinking Writing

The traditional Western view of writing, from Aristotle down to the present day, has treated the written word as a visual substitute for the spoken word. The eminent Swiss linguist Ferdinand de Saussure (1857-1913) was the first to provide this traditional assumption with a reasoned basis by incorporating it into a more general theory of signs. In the wake of Saussure's work, modern linguistics has ignored or marginalized writing in favour of the study of speech. In all literate societies, however, speech in turn is interpreted by reference to the culturally dominant writing system. This puts in place a system of educational values which ensures that the more literate members of society maintain superiority over the less literate, and at the same time establishes a hierarchy among literate societies which favours the local product (alphabetic scripts in the Western Case). Roy Harris shows that the theory of writing adopted in modern linguistics is deeply flawed. Reversing the orthodox priorities, the author argues that writing is a far more powerful mode of linguistic communication than speech could ever be. His book is a major contribution to current debates about human communication written and spoken. **TP \$39.95**

Civilization One

This is the extraordinary story of how the quest to try to crack the mystery of the "Megalithic Yard" – an ancient unit of linear measurement – led to the discovery of compelling evidence pointing to the existence of an unknown, highly advanced culture which was the precursor to the earliest known civilizations such as the Sumerians and the Egyptians. There must have been a Civilization One. The authors show how this very precise unit of 82.966656 cm, proven to have been used in the construction of thousands of Megalithic structures in Britain and France, was derived from observing the rate of spin of the Earth – based on a form of geometry that had 366 to match the 366 rotations of the Earth in a year. They reveal how this is part of an integrated system, far more advanced than anything used today, which forms the basis of both the Imperial and Metric measure systems. The ancient scientists understood the dimensions, motions and relationships of the Earth, Moon and Sun – they measured the solar system and even understood how the speed of light was integrated into the movements of our planet. The implications of these revelations go far beyond the fascination of discovering a super-science of prehistory, they indicate a grand plan which will have far-reaching theological ramifications! **TP \$29.95**

Who Built the Moon?

The moon has confounded scientists for many years. It does not obey the known rules of astrophysics and there is no coherent theory of its origin – in fact it should not really be there. When researching the ancient Stone Age system of geometry and measurement, which they revealed in their previous book, Civilization One, the authors were surprised to discover that the system also works perfectly on the Moon. On further investigation, they found a consistent sequence of beautiful integer numbers when looking at every major aspect of the Moon, while no pattern emerges for any other planet or moon in the solar system. For example, the Moon revolves at exactly one hundredth of the speed that the Earth turns on its axis; moreover, the Moon is exactly 400 times smaller than the Sun and 400 times closer to the Earth. They also discovered that the Moon possesses little or no heavy metals and has no core. In fact, many specialists suspect that the Moon is hollow, which should not be possible. If our Moon did not exist ... nor would we. Higher life only developed on Earth because the Moon is exactly what it is and where it is. When all of the facts are dispassionately reviewed, it becomes unreasonable to cling to the idea that the Moon is a natural object. The only question that remains is, "Who built it"? **TP \$29.95**

The Fruits of War

Since man first wielded a stick in anger, war and conflict have been prime movers in the progress of science and technology. In our earliest days the impetus may have been as simple as protecting territory or a food supply; more recently science has benefited from massive injections of cash when national security is at stake. But as Michael White demonstrates in this superbly wide-ranging and brilliant history of innovation, almost all major technological developments can be traced back to times of war. From the arrow to nuclear power; from cuneiform to the credit card; from the chariot to the bullet train and from the tribal drum to the Internet, our creativity owes much to the destructiveness of our nature.

Accessible, thought-provoking and chock-full of fascinating facts, **THE FRUITS OF WAR** is a superb history of science and innovation that shows how the best of humanity often flows from its worst. **TP \$34.95**

Tom Sedley's idyllic summer vacation in a leafy post war suburb of north London came to an abrupt and shocking end on the 14th September, 1948 when his sister was brutally murdered in woodland near his house. A tramp was arrested for the crime but for the young boy it was the end of childhood and the beginning of a lifelong search to discover what had actually happened that late summer day. Marcus Warwick was Tom's neighbour and best friend but the murder changed their relationship forever: suspicion clouded Tom's mind and they drifted apart. Unknown to each other they were both sent to Korea two years later, Warwick an officer, Sedley as a humble radio man: and when they met in the chaos of war they both had to acknowledge a gulf of distrust and class had opened between the two. Their new relationship was tested in the savagery of the combat that swept up and down the peninsula that first winter. When Tom and Marcus met again it was in combat and it soon became apparent that the one could barely trust the other with his life. The bitterness of what they experienced scarred them for the rest of their lives. Only years later when Tom stumbles across his sister's secret diary do the events of 1948 once more leap into sharp focus and allow him to seek final justice for her murder.

The Handbook: The Unofficial and Unauthorised Guide to the Production of Doctor Who

David J Howe, Mark Stammers & Stephen James Walker

The complete guide to the production of Doctor Who from 1963 to 1996 - in one bumper volume!

On their first publication, the Doctor Who Handbooks were hailed for their comprehensive behind the scenes exploration of the BBC's cult science fiction show Doctor Who. Now collected in a revised and updated edition, this book is the definitive guide to the background and production of a television classic. Authors David J Howe, Stephen James Walker and Mark Stammers spent a decade researching, and then a decade writing this acclaimed and in-depth look at the background to Doctor Who. Every Doctor's era is examined through articles and analysis, key decisions are documented, and the people involved in these decisions interviewed or quoted to create one of the most revealing behind the scenes books on the trials and tribulations of arguably the greatest cult show ever to grace Saturday evening television.

Includes extensive interview quotes from all eight television Doctors, many of the actors and actresses who played their faithful companions, and literally dozens of production team members - producers, script editors, directors, designers and other behind-the-scenes staff - who brought the original series and the 1996 TV movie to the screen over a period of some thirty-three years.

Features articles on the Doctor, his companions, the effects, the locations, the costume design, the script editing, the mythos behind the series and much, much more. Includes detailed script to screen examinations of one story from each for the first seven Doctors' eras, analysis of the media attention given to the series, plus an exhaustive breakdown of the production of the first three years of the show. **TP \$53.95 HC \$99.95**

Stealer of Dreams

Steve Lyons

In the far future, the Doctor, Rose and Captain Jack find a world on which fiction has been outlawed. A world where it's a crime to tell stories, a crime to lie, a crime to hope, and a crime to dream. But now somebody is challenging the status quo. A pirate TV station urges people to fight back. And the Doctor wants to help - until he sees how easily dreams can turn into nightmares. With one of his companions stalked by shadows and the other committed to an asylum, the Doctor is forced to admit that fiction can be dangerous after all. Though perhaps it is not as deadly as the truth? **HC \$19.95**
